Lync.NET, The Leading Provider of Technology To Automate Wealth Management Reporting Releases PackMan 2007

Salt Lake City, UT, September 27, 2006 – Lync.NET, announces the official release of PackMan 2007 to selected client firms. "PackMan 2007 incorporates the most requested features from our client base of over 150 leading wealth management firms. The top 10 new features of PackMan 2007 include:

1. **Selected Excel Worksheets** – One or more selected worksheets are now automatically included in report packages without manual intervention.
2. **Virtual Groups** – Quickly and easily create and manage account groups for reporting purposes in PackMan and eliminate tedious and hard to maintain groups in portfolio accounting systems .
3. **Automatic Default Locations** – Axys™ Reports, Microsoft Office™ Documents, PDF Documents and other Multi-Type document paths are now defaulted when creating new report package profiles, which streamlines and speeds up period end processing.
4. **Toolbar and Icons** - A new toolbar has been added with logical, relevant icons for all options in the software menus, which adds efficiency when navigating the software.
5. **Sarbanes-Oxley Compliance Security Enhancements** – Microsoft SQL Server™ Database passwords, FTP passwords and the addition of Secure FTP (SFTP) data transmissions to WebReps™ have been added to assure that confidential client data is encrypted and secure through the entire report production and web presentation process and assures compliance with the Sarbanes-Oxley Act of 2002.
7. **Data Exports** – A fast, convenient function has been added to export mission critical client reporting package data into industry standard comma separated value (CSV) files which can be easily read and manipulated with Microsoft Office™.
8. **Database Select** - PackMan allows you to attach to one or more Microsoft SQL Server™ databases, which decreases administration time and overhead in multiple user environments.
9. **Microsoft SQL Server 2005™** - PackMan has been fully integrated with Microsoft SQL Server 2005™ or the Free Microsoft SQL Server Express 2005™ which includes an easy to manage graphical environment. This upgrade replaces Microsoft MSDE™, which is no longer supported by Microsoft Corporation, Inc.
10. **Installation Program** – A new, easy to use installation and upgrade process from previous versions of PackMan as well as new installations can be accomplished in as little as 5 minutes without the need for expensive IT consultants or time wasting manual processes.

We have also added some other great new features that save time and money. I have had tremendous success and positive feedback from our beta customers. I am ecstatic about PackMan 2007 and can't wait to implement the rest of our client base. We anticipate the full roll-out of PackMan 2007 will be accomplished by the end of 2006", says Steven Hempel, a Lync.NET employee and Technical Support Manager for Packman and WebReps.

About Lync.NET PackMan

Lync.NET PackMan™ is Lync.NET's technology that fully automates the back office operations of setting up, generating and distributing period end reports for the clients of wealth management firms. This enterprise solution leverages a Microsoft SQL Server™ database and an easy to use PC-based user interface. PackMan delivers improved client service and economies of scale with enhanced security for compliance with Sarbanes-Oxley.

About Lync.NET
