Pittsburgh Investment Advisor Reduces Operating Costs by Implementing PackMan: the Market-Leading Report Collating Software.

New York, NY, June 10th, 2004 – Lync.NET, the one stop for investment management technology, announces that Hefren Tillotson Inc, a full-service investment advisory firm headquartered in Pittsburgh, has chosen PackMan from Lync.NET to automate period-end reporting. PackMan 2004 helps achieve straight through processing and reduces operating costs and automates the entire reporting cycle at period end.

“To automate our quarterly client reports, we looked at many options. We chose Lync because of their expertise in building systems and implementing solutions that satisfied numerous clients over the years. Lync created a solution that exceeded our expectations in quality, service, and cost.”

~ Don Belt, CIO - Hefren Tillotson

PackMan 2004 is part of the InvestPro™ suite of products. All of the InvestPro™ components can operate as a seamlessly integrated whole solution or à la cart with your existing systems. The products are scalable to accommodate a range of investment firm sizes and budgets. For more information on PackMan 2004 or other InvestPro™ offerings; please contact sales@lync.net

About Lync.NET

Lync.NET's product suite, the InvestPro™ is the first and only complete, integrated, web-based, Microsoft SQL database throughout solution that automates mission critical requirements of professional investment firms.

Lync.NET was founded in 1995 and has provided technology solutions to hundreds of professional investment firms ranging from investment advisors to century old global custodians.
